7. General Safety Message

DRIVING IN THE RAIN

Roads are slickest when it first starts to rain. Water mixes with motor oil in and on the pavement and makes roads especially slippery. If it rains long or hard enough, the mixture will wash away, but then the water itself becomes a hazard. Below are some helpful hints:

- Reduce your speed.
- Turn on low-beam headlights and wipers.
- Stay in the middle lanes. Water tends to pool in outside lanes.
- Do not drive through standing water, especially if you do not know how deep it is.
- Avoid swerving and abrupt braking.
- Check your mirrors more frequently and set them to minimize blind spots. Rain on your outside mirrors and rear window can distort your view or make things harder to see.
